BACHELOR OF SCIENCE IN OPTOMETRY

JAMES S. CARTER	Holliston, Massachusetts

The information in this booklet should not be considered official proof that the degree was received. All inquiries should be directed to the Registrar's Office.

THE NEW ENGLAND COLLEGE OF OPTOMETRY
1992 HONORARY DEGREE RECIPIENT

DR. MICHEL MILLODOT

Professor Michel Millodot was born and educated in France where he graduated from the Ecole Superieure d'Optometrie in Paris. In 1962 he earned his Doctor of Optometry Degree from the College of Optometry of Ontario in Toronto, Canada. He returned to London, England, where he passed the Fellowship Diploma of the British Optical Association. Subsequently he enrolled at Indiana University where he completed a Master of Science Degree. From 1965 to 1967 he taught at the University of Montreal and then attended Brown University earning his Ph.D. in 1970. He returned to join the faculty at the University of Montreal and in 1974 he accepted the post of Professor and Head of the Department of Optometry at the University of Wales in Cardiff. After more than fifteen years of service in this position, Dr. Millodot became Professor and Head of the Department of Diagnostic Sciences at Hong Kong Polytechnic. Professor Millodot's illustrious career is distinctive for its extensive involvement in optometric education on three continents.

Professor Millodot's research interests have included corneal sensitivity and its link to contact lenses, an area in which he worked for some 20 years, electrophysiological measurements of refraction and accommodation, and the introduction of the theory of the artifact of retinoscopy. Professor Millodot has written over 100 papers which have been published in optometric, ophthalmological, and general scientific journals. He is the author of the first Dictionary of Optometry, now in its second edition, which has been translated in French, Spanish, German, and soon in Chinese and currently serves on the editorial boards of several international journals.

Professor Millodot has demonstrated a long-term commitment to international optometry. He introduced the term optometry in Great Britain when the University of Wales honored his request to rename his Department in 1975. He originated the term experimental optometry and in 1980 founded in Great Britain the Society of Experimental Optometry which subsequently made him its patron. He also served as Vice-President of the European Association of Schools and Colleges of Optometry until 1990.

Professor Millodot has received many honors including the Research Medal of the British Optical Association, the Lord Charnwood Memorial Lecture Award of the British Chapter of the American Academy of Optometry, the HB Marton Lecture Award of the University of Manchester, and the Clair Bobier Distinguished Lecture Award of the University of Waterloo.

THE OPTOMETRIC OATH*

With full deliberation I freely and solemnly pledge that:

I will practice the art and science of optometry faithfully and conscientiously, and to the fullest scope of my competence.

I will uphold and honorably promote by example and action the highest standards, ethics and ideals of my chosen profession and the honor of the degree, Doctor of Optometry, which has been granted me.

I will provide professional care for those who seek my services, with concern, with compassion and with due regard for their human rights and dignity.

I will place the treatment of those who seek my care above personal gain and strive to see that none shall lack for proper care.

I will hold as privileged and inviolable all information entrusted to me in confidence by my patients.

I will advise my patients fully and honestly of all which may serve to restore, maintain or enhance their vision and general health.

I will strive continuously to broaden my knowledge and skills so that my patients may benefit from all new and efficacious means to enhance the care of human vision.

I will share information cordially and unselfishly with my fellow optometrists and other professionals for the benefit of patients and the advancement of human knowledge and welfare.

I will do my utmost to serve my community, my country and humankind as a citizen as well as an optometrist.

I hereby commit myself to be steadfast in the performance of this my solemn oath and obligation.

* Adopted by the American Optometric Association and the Association of Schools and Colleges of Optometry
